

MEMORANDUM

To: Bruce Bolden

From: Christian Baisch

Subject: Final Sprint

Date: May 9, 2017

Overview

This was the last spring of the project. It went alright. There are a few issues to discuss. Overall it was a fun project to work on with a few learning experiences.

Summary

In this sprint things got kind of confusing. I seem to have this problem with coordination things properly with Homajam on the grid section. For the past few springs we end up working on the same thing and then my work goes to waste or it doesn't work. Besides that issue, I think this project went alright. The team seemed to have some issues communicating. We would discuss what to do next at the end of classes but it was difficult for us to meet outside of that. I also feel like since our group was so big, it lead some people to jump onto people's toes causing more problems. Still overall I think we did a good job. It was interesting seeing the project slowly form together as each person fit their pieces into the puzzle.

To view some of the work that I have done go to my google drive:
