

MEMORANDUM

To: Bruce Bolden

From: Maxwell Thornburg

Subject: Memorandum

Date: May 9, 2017

1 What I did and how it went.

I worked closely with Mr. Clemmins during the course of this project to create a comfortable UI to house our grid space in. I laid the groundwork for the layouts in the QT creator and got the color dialog box to behave. I learned a lot about QT and GIT during the course of this project, and I believe there is a lot of potential for QT to make some high quality UI elements. I don't understand it well enough to produce that kind of quality but with lots of extra time and it wouldn't be too difficult. This document is being written in latex so I learned to do that this semester as well.

Working 40 hour work weeks and having 3 classes made paying attention to detail difficult during the semester. I did as much as I could to ensure our team took priority over my other classes. This is the only memo I've had time to write so far and it will be the last one I write for this project. I wanted to include all we've covered and our ideas for improvement after watching other groups present but I'm going to keep this short and just say that I'm happy with how much we got done and how our project turned out.
