MEMORANDUM

To: Bruce Bolden

From: Wyatt Knickerbocker

Subject: Final Memo

Date: May 9, 2017

Introduction   In this memo I will discuss the work done in the loading functions in the project.

Loading   I have added the functionality to load .tan files of version 0.4 into the Goofy Lights Editor. The files, if not sized properly to the display screen, will be centered based on the current grid size. Using the screen update function provided, it will then push the loaded file to the program proper.
